

montaigne

montaigne and other products. year in review

December 18, 2024 · [read online](#)

Hi everyone.

Anton here.

I thought I'd share some numbers with you. I think some of you enjoy those updates.

montaigne.io <https://montaigne.io/> - 3700+ users and 4K sites created since the launch in 2022. To this day I think it's still my most popular project. It also has the highest number of paying customers (thank you!). But unfortunately I still failed to make it break even in 2024. It brings a bit of money, but less than my expenses running it.

alto.daily <https://apps.apple.com/us/app/alto-daily/id6478018751?mt=12> - iOS app to track habits backed by Apple Reminders. I only launched it in August 2024 and 1700 people installed it (way less active users, but those are harder to measure). I'm happy with this one - since really it was my first iOS app! 10 people donated to support development and it brought \$42 (pre Apple Tax).

alto.computer <https://apps.apple.com/us/app/alto-computer/id6480425094?mt=12> - macOS utility app for Apple Notes. 1300 people installed it since I released it in April 2024. 15 people donated and 24 people purchased Apple Notes Exporter add-on.

alto.mail <https://apps.apple.com/us/app/alto-mail/id6717600529?mt=12> - macOS plugin for Apple Mail. 247 installed it since the release in Sept 2024.

alto.start <https://apps.apple.com/us/app/alto-start/id6738673683?mt=12> - Safari new tab plugin that shows your Apple Reminders every time you open a new tab. Released a few weeks ago. 69 people installed it.

public.me <https://public.me/> - blogging tool backed by iMessage. Released 1.5 months ago. 508 users registered. 4568 messages sent. Also got two important donations that helped a lot (thank you)!

There were a few more apps that I published (but they have no more than 300 downloads so far). Plus I relaunched <https://recuremail.com/> with a new name and more protections from spammers.

Anyway, thank you for trying and using my products. It means a lot to me. Even if you did use them in the past and stopped.

If you love some of those projects and would like to see more from me - write to me.

Happy holidays,

Anton
